

JEREMIAS IVAN, PhD

Canberra, ACT, Australia | jeremias.ivan98@outlook.com | <https://github.com/jeremiasivan>

PROFILE

Postdoctoral researcher in Evolutionary Biology, specialising in phylogenomic methods development to improve gene tree inference from genomic data, with a strong research and publication record spanning phylogenomics, cancer genomics, and computational biology. Seeking a research fellowship in bioinformatics, phylogenomics, or genome-wide association studies.

EDUCATION

Doctor of Philosophy in Evolutionary Biology

Aug 2022 - Jul 2026

Lanfear Group, Australian National University (ANU), Canberra, Australia

- Thesis: *New Methods to Improve Phylogenomic Inference*
- Supervisors: Prof. Robert Lanfear, A/Prof. Minh Bui, Prof. Justin Borevitz

Bachelor of Science in Bioinformatics

Sep 2016 - Oct 2020

Indonesia International Institute for Life Sciences (I3L), Jakarta, Indonesia

- GPA: 3.92 / 4.00 (*cum laude*)
- Thesis: *Comparative Phylogeography and Molecular Evolution of Australian Eugongylinae Skinks*
- Supervisors: Rizky Nurdiansyah, Prof. Craig Moritz, Dr. Sally Potter, Dr. Xia Hua

RELEVANT SKILLS

- **Bioinformatics:** phylogenomic inference for whole-genome data (e.g., IQ-TREE, ASTRAL); phylogenomic method development to detect systematic errors (e.g., contamination, reference bias); assessment of gene tree topological variation (e.g., ILS, introgression)
- **Programming and tools:** R (R Markdown, Quarto), UNIX, Git, high-performance computing (HPC)
- **Languages:** Indonesian (native), English (fluent)

RESEARCH AND TEACHING EXPERIENCE

Technical Assistant, Borevitz Lab [Casual]

May 2026 - Present

ANU, Canberra, Australia

- Reconstructed the phylogeny of Eucalypts (comprising *Angophora*, *Corymbia*, and *Eucalyptus*) from whole-genome short-read data of more than 1,000 samples
- Identified mislabeled and/or contaminated samples based on gene tree topological variation

Research Assistant, Moritz Lab [Casual]

Jun - Jul 2026

ANU, Canberra, Australia

- Reconstructed the phylogeny of sexual diploid and asexual triploid samples of *Heteronotia* geckos based on exon-capture data
- Identified gene conversion events and recombination events in the genomes of asexual triploid samples

Final Exam Markers, Gene Expression and Regulation (BIOL2161) [Casual]

Jun 2026

ANU, Canberra, Australia

- Marked written final examination sheets of undergraduate students following the course rubrics, in coordination with the course convenor (Prof. Marcin Adamski) and other lecturers

Tutor, Data Science for Biologists (BIOL3207/6207) [Casual]

2023 - 2026

ANU, Canberra, Australia

- Assisted undergraduate and graduate students for three semesters with data science in Biology using R and GitHub, including weekly readings and research idea development for the final project
- Marked and provided feedback on students' submitted works
- Discussed regularly with the course convenor (Prof. Robert Lanfear) and other tutors

Demonstrator, R + Quarto Workshop [Casual]

Apr 2024

ANU, Canberra, Australia

- Assisted undergraduate and graduate students with data science in Biology using R, including data analysis using *tidyverse* package and data presentation using *Quarto*

Cancer Epigenetics Pipeline Development

Oct 2020 - Apr 2021

I3L, Jakarta, Indonesia

- Developed automated epigenetics pipeline to download, filter, and identify differentially-expressed cancer biomarkers from The Cancer Genome Atlas (TCGA) dataset
- Supervisor: A/Prof. David Agustriawan

Credit Internship and Thesis Writing

Jul 2019 - Oct 2020

ANU, Canberra, Australia

- Assessed how climatic variation over time and space influences the evolution and diversity of Australian Eugongylinae skinks
- Supervisors: Prof. Craig Moritz, Dr. Rust Turakulov, Dr. Sally Potter, Dr. Xia Hua

Non-credit Internship

Jun - Aug 2018

Asia University, Taichung, Taiwan

- Developed automated pipeline to detect differentially-expressed methylation probes in cervical cancer patients based on TCGA dataset
- Supervisors: Prof. Ka-Lok Ng, Dr. Ezra B. Wijaya, Dr. Effendi Zainuddin, Dr. Eskezia Yihunie

OTHER PROFESSIONAL EXPERIENCES

Back End Developer

Feb - Dec 2022

Wardaya College, Jakarta, Indonesia

- Led REST API development using Golang (Gin framework, GORM) and managed apps deployment in AWS Elastic Beanstalk
- Collaborated with senior developer on database migration, including ERD reconstruction, AWS RDS instance setup, and data migration

Software Engineer Intern / Back End Developer

Apr - Dec 2021

PT. Moutar Technologies Indonesia, Jakarta, Indonesia

- Developed mobile and web applications using Golang (backend) and AWS/PostgreSQL, with regular discussion with CEO, apps designer, and Marketing Team

AWARDS

- A\$150 Travel Grant, AES 2025 (Oct 2025)
- Hirata Naora Best Presentation Awards, RSB HDR Conference, ANU (Apr 2024)

- Australian Government Research Training Program (AG RTP) Stipend Scholarship and International Fee Offset Scholarship, ANU (Aug 2022)
- Best Graduate of Bioinformatics with GPA = 3.92, I3L (Oct 2020)
- ANU Future Research Talent Awards 2020 at Moritz Lab, ANU (Mar 2020)
- Best Paper, Bioinformatics and Data Mining Symposium, BioMIC 2019 (Sep 2019)
- Partial scholarship (50% of total tuition fees), I3L (Aug 2016)
